# Report

#### 1850106 陈子杰

2. 正文: 简要介绍代码主要功能,突出亮点,加分项会考虑此处介绍; github仓库地址和部署后的作业 html 地址。

# 项目简介

本项目用原生html+css+js实现了一个TodoList,支持用户自定义添加todolist,并勾选完成。在此之上,还添加了一些额外功能,如设定项目截止日期、设定每日提醒等。

# 主要功能介绍及展示

### 基础功能

- 新增列表:在上方输入栏中输入list名字即可添加任务
- 删除列表:点击任务右侧垃圾桶小图标即可删除列表
- 展现列表:在正在进行、已经完成和每日提醒下方列表展现所有任务
- 全部完成/取消: **正在进行**字样右侧有四个按钮,前两个分别为全部完成与全部未完成。点击后可以 让所有选项全部完成或未完成。
- 删除已完成/删除全部:后两个按钮分别为删除已完成/删除全部。点击后可以删除已完成选项或删除全部选项
- 保存页面状态:使用网页的localstorage实现数据持久化功能。该存储状态不手动清除不会消失, 因此可以当作本地数据库使用。

## 高级功能

- 添加日期:用户可以为任务添加截止日期。点击输入栏右侧的日历即可选择截止日期
- 紧急提醒:每个人物左侧会有一个小边栏通过颜色来显示任务的紧急程度。红色为非常紧急,橙色为紧急,黄色为不紧急,灰色为已超过截止日期。没有设置截止日期的任务会显示为墨绿色。完成的任务显示为绿色。
- 每日提醒:点击任务栏右侧的时钟图案可以将该任务设置为每日提醒。每日提醒的任务在每天结束 后都会调整为非勾选状态。
- 编辑单条todo: 点击已经设定好的任务, 可以通过输入栏x修改任务描述。
- 左滑删除:在移动端,可以通过左滑任务来删除该任务。
- 字体大小自适应: 该网页可以自适应PC端与手机端, 界面、字体自适应地调整为合适的大小
- 适配深色模式与浅色模式:在手机端,网页可以根据手机端的深色或浅色模式自适应地调整为对应 色系。
- 删除todo手机震动提示:在左滑删除todolist的过程中,没有提示会显得有一些突兀,增加振动提示可以提高用户体验。由于适配原因,该功能仅在安卓端生效。
- 自动排序:根据ddl时间先后顺序进行排序

## 功能展示

• 创建list:

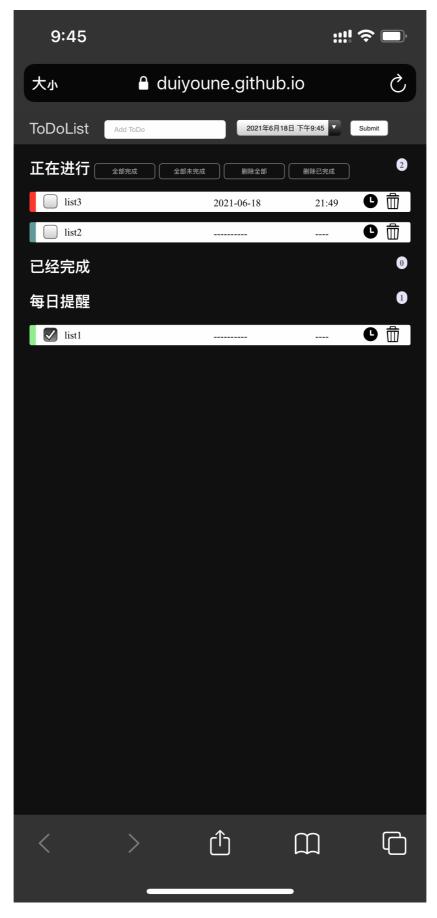

• 为list设置时间:

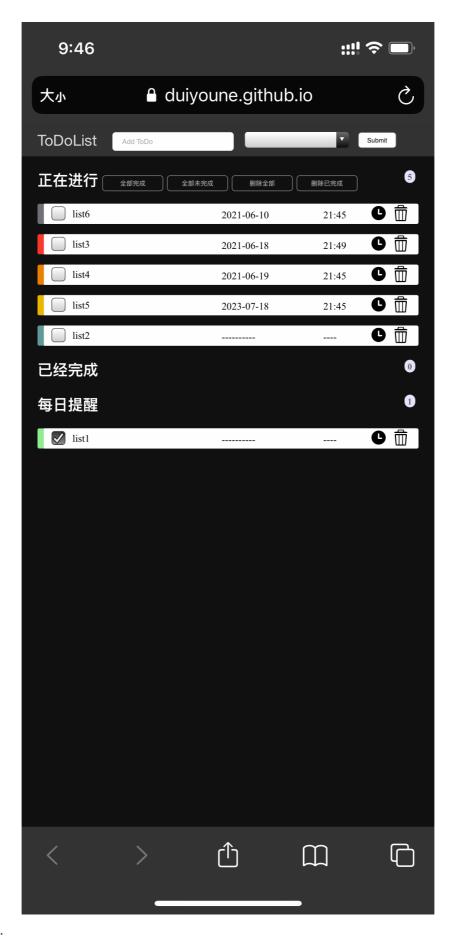

• 将list添加到每日提醒:

• 根据ddl显示任务紧急程度:

• 全部完成:

• 全部未完成:

• 滑动删除:

## 核心代码

• 界面设计

```
<!DOCTYPE html>
<html>
<head>
   <meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
   <meta name="viewport" content="width=600, viewport-fit=cover initial-</pre>
scale=0.6, maximum-scale=1.0, user-scalable=no">
   <title>ToDoMVC</title>
   <link rel="stylesheet" href="./index.css">
</head>
<body>
   <div class="header">
       <div class="box">
           <form action="javascript:post()" id="form">
               <label for="title">ToDoList</label>
               <input type="text" id="title" name="title" placeholder="Add</pre>
ToDo" required="required"
                  autocomplete="off" />
              <input type="datetime-local" id="datetime" value="2021-07-</pre>
01T12: 00" />
               <button class="submit" id="submit">Submit
           </form>
       </div>
   </div>
   <!-- 主体: 在这进行任务和已完成 -->
   <div class="content">
       <h2 class="running">正在进行
           <button class="batch" onclick="allFinish()">全部完成</putton>
           <button class="batch" onclick="allUnfinish()">全部未完
成</button>
           <button class="batch" onclick="clearall()">删除全部
           <button class="batch" onclick="clearFinished()">删除已完
成</button>
           <span id="todocount"></span>
       </h2>
       <h2>已经完成 <span id="donecount"></span></h2>
       ul id="donelist">
       <h2>每日提醒 <span id="repeatcount"></span></h2>
       id="repeatlist" class="demo-box">
       </div>
```

```
<script type="text/javascript" src="./index.js"></script>
</body>
</html>
```

#### • 获取list节点

```
function post() {
    var title = document.getElementById("title");
    var datetime = document.getElementById("datetime");
    if (title.value.trim() == "") {
        alert("内容不能为空");
    } else {
       var data = loadData();
        if (datetime.value.trim() == "") {
            var todo = { "title": title.value, "done": false, "repeat":
false, "date": "-----", "time": "----", "lastchecktime": "" };
        } else {
            var todo = { "title": title.value, "done": false, "repeat":
false, "date": datetime.value.substring(0, 10), "time":
datetime.value.substring(11, 16), "lastchecktime": "" };
       data.push(todo);
        saveData(data);
       var form = document.getElementById("form");
       form.reset();
       load();
    }
}
```

#### ● 加载localstorage数据

```
return data;
} else return [];
}
```

#### ● 存储数据

```
function saveSort() {
   var todolist = document.getElementById("todolist");
   var donelist = document.getElementById("donelist");
    var repeatlist = document.getElementById("repeatlist");
    var ts = todolist.getElementsByTagName("p");
    var ds = donelist.getElementsByTagName("p");
    var rs = donelist.getElementsByTagName("p");
    var data = [];
    for (i = 0; i < ts.length; i++) {
        var todo = { "title": ts[i].innerHTML, "done": false };
        data.unshift(todo);
    }
    for (i = 0; i < ds.length; i++) {
        var todo = { "title": ds[i].innerHTML, "done": true };
        data.unshift(todo);
    }
    for (i = 0; i < rs.length; i++) {
        var todo = { "title": rs[i].innerHTML, "done": false };
        data.unshift(todo);
    }
    saveData(data);
}
function saveData(data) {
    localStorage.setItem("todo", JSON.stringify(data));
}
```

#### ● 移除/更新列表中某一项

```
//移除list中某一项
function remove(i) {
    var data = loadData();
    var todo = data.splice(i, 1)[0];
    saveData(data);
    load();
}

//更新list中某一项
function update(i, field, value) {
    var data = loadData();
    var todo = data.splice(i, 1)[0];
    todo[field] = value;
```

```
data.splice(i, 0, todo);
saveData(data);
load();
setLastCheckTime(i);
}
```

#### 对list排序

```
对list进行排序
function sort() {
    var data = loadData();
    if (data.length > 0) {
        for (i = 0; i < data.length; i++) {
            for (j = 0; j < data.length - 1 - i; j++) {
                if (compare(j, j + 1, data) == j + 1) {
                    var temp = data[j];
                    data[j] = data[j + 1];
                    data[j + 1] = temp;
                }
            }
        saveData(data);
    }
比较list时间先后顺序
function compare(i, j, data) {
    if (data == [])
        return i;
    if (data[j].date.substring(0, 4) == '----')
        return i;
    else if (data[i].date.substring(0, 4) == '----')
        return j;
    else {
        if (parseInt(data[i].date.substring(0, 4)) <</pre>
parseInt(data[j].date.substring(0, 4)))
            return i;
        else if (parseInt(data[i].date.substring(0, 4)) >
parseInt(data[j].date.substring(0, 4)))
            return j;
        else {
            if (parseInt(data[i].date.substring(5, 7)) <</pre>
parseInt(data[j].date.substring(5, 7)))
                return i;
            else if (parseInt(data[i].date.substring(5, 7)) >
parseInt(data[j].date.substring(5, 7)))
                return j;
```

```
else {
                if (parseInt(data[i].date.substring(8, 10)) <</pre>
parseInt(data[j].date.substring(8, 10)))
                     return i;
                else if (parseInt(data[i].date.substring(8, 10)) >
parseInt(data[j].date.substring(8, 10)))
                    return j;
                else {
                     if (parseInt(data[i].time.substring(0, 2)) <</pre>
parseInt(data[j].time.substring(0, 2)))
                         return i;
                     else if (parseInt(data[i].time.substring(0, 2)) >
parseInt(data[j].time.substring(0, 2)))
                         return j;
                     else {
                         if (parseInt(data[i].time.substring(3, 5)) <</pre>
parseInt(data[j].time.substring(3, 5)))
                         else if (parseInt(data[i].time.substring(3, 5)) >
parseInt(data[j].time.substring(3, 5)))
                             return j;
                         else
                             return i;
                     }
                }
            }
    }
```

#### ● 编辑某一项

```
//编辑某一项todolist
function edit(i) {
    load();
    var p = document.getElementById("p-" + i);
    title = p.innerHTML;
    p.innerHTML = "<input id='input-" + i + "' value='" + title + "' />";
    var input = document.getElementById("input-" + i);
    input.setSelectionRange(0, input.value.length);
    input.focus();
    input.onblur = function () {
        if (input.value.length == 0) {
            p.innerHTML = title;
            alert("内容不能为空");
        } else {
            update(i, "title", input.value);
```

```
};
};
```

#### • 计算任务紧急程度

```
//计算任务紧急程度
function calculateTime(i) {
    var data = loadData();
    var currTime = getCurrTime();
    if (data[i].date.substring(0, 4) == '----')
        return;
    if (parseInt(data[i].date.substring(0, 4)) < currTime.year)</pre>
        return 'border-left: 10px solid #707075;'
    if (parseInt(data[i].date.substring(0, 4)) > currTime.year)
        return 'border-left: 10px solid #eab700;'
    if (parseInt(data[i].date.substring(5, 7)) < currTime.month)</pre>
        return 'border-left: 10px solid #707075;'
    if (parseInt(data[i].date.substring(5, 7)) > currTime.month)
        return 'border-left: 10px solid #eab700;'
    if (parseInt(data[i].date.substring(8, 10)) < currTime.day)</pre>
        return 'border-left: 10px solid #707075;'
    if (parseInt(data[i].date.substring(8, 10)) > currTime.day)
        return 'border-left: 10px solid #ea8000;'
    if (parseInt(data[i].time.substring(0, 2)) < currTime.hour)</pre>
        return 'border-left: 10px solid #707075;'
    if (parseInt(data[i].time.substring(0, 2)) > currTime.hour)
        return 'border-left: 10px solid #fb372c;'
    if (parseInt(data[i].time.substring(3, 5)) < currTime.minute)</pre>
        return 'border-left: 10px solid #707075;'
    return 'border-left: 10px solid #fb372c;'
}
```

#### ● 通过数据加载界面

```
function load() {
    // sort();
    var todolist = document.getElementById("todolist");
    var donelist = document.getElementById("donelist");
    var repeatlist = document.getElementById("repeatlist");
    var repeatdonelist = document.getElementById("repeatdonelist");
    var collection = localStorage.getItem("todo");
    var todoCount = 0;
    var doneCount = 0;
    var repeatCount = 0;
    var todoString = "";
    var doneString = "";
    var repeatString = "";
```

```
var repeatDoneString = "";
   if (collection != null) {
       var data = JSON.parse(collection);
       for (var i = 0; i < data.length; i++) {
          if (data[i].repeat) {
              if (!data[i].done) {
                 repeatString += "
style='" + calculateTime(i) + "' ><input type='checkbox' class='checkbox'</pre>
onchange='update(" + i + ",\"done\",true)' />" +
                     "" +
data[i].title + "" +
                     "<div class='Date' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].date + "</div>" +
                     "<div class='Time' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].time + "</div>" +
                     "<input class='repeat' type='image'
src='./time.svg' onclick=update(" + i + ",\"repeat\",false)>" +
                     "<input class='delete' type='image'
src='./delete.svg' onclick=remove(" + i + ")>";
                 repeatCount++;
              } else {
                 repeatDoneString += "
<input type='checkbox' class='checkbox' onchange='update(" + i +</pre>
",\"done\",false)' checked='checked' />" +
                     """ +
data[i].title + "" +
                     "<div class='Date' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].date + "</div>" +
                     "<div class='Time' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].time + "</div>" +
                     "<input class='repeat' type='image'
src='./time.svg' onclick=update(" + i + ",\"repeat\",false)>" +
                     "<input class='delete' type='image'
src='./delete.svg' onclick=remove(" + i + ")>";
                 repeatCount++;
          } else {
              if (data[i].done) {
                 doneString += "<input</pre>
type='checkbox' class='checkbox' onchange='update(" + i +
",\"done\",false)' checked='checked' />" +
                     """ +
data[i].title + "" +
                     "<div class='Date' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].date + "</div>" +
                     "<div class='Time' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].time + "</div>" +
```

```
"<input class='repeat' type='image'
src='./time.svg' onclick=update(" + i + ",\"repeat\",true)>" +
                       "<input class='delete' type='image'
src='./delete.svg' onclick=remove(" + i + ")>";
                   doneCount++;
               } else {
                   todoString += "
style='" + calculateTime(i) + "'><input type='checkbox' class='checkbox'</pre>
onchange='update(" + i + ",\"done\",true)' />" +
                       "" +
data[i].title + "" +
                       "<div class='Date' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].date + "</div>" +
                       "<div class='Time' id='p-" + i + "' onclick='edit("
+ i + ")'>" + data[i].time + "</div>" +
                       "<input class='repeat' type='image'
src='./time.svg' onclick=update(" + i + ",\"repeat\",true)>" +
                       "<input class='delete' type='image'
src='./delete.svg' onclick=remove(" + i + ")>";
                   todoCount++;
               }
           }
       };
       todocount.innerHTML = todoCount;
       todolist.innerHTML = todoString;
       donecount.innerHTML = doneCount;
       donelist.innerHTML = doneString;
       repeatcount.innerHTML = repeatCount;
       repeatlist.innerHTML = repeatString;
       repeatdonelist.innerHTML = repeatDoneString;
   } else {
       todocount.innerHTML = 0;
       todolist.innerHTML = "";
       donecount.innerHTML = 0;
       donelist.innerHTML = "";
       repeatcount.innerHTML = 0;
       repeatlist.innerHTML = "";
       repeatdonelist.innerHTML = "";
   }
}
```

#### • 全部完成/未完成/清除

```
//全部完成
function allFinish() {
  var data = loadData();
  for (i = 0; i < data.length; i++) {</pre>
```

```
data[i].done = true;
    }
    saveData(data);
    load();
}
//清除全部localstorage
function clearall() {
    localStorage.clear();
    load();
}
//全部未完成
function allUnfinish() {
   var data = loadData();
    for (i = 0; i < data.length; i++) {
        data[i].done = false;
    }
    saveData(data);
    load();
}
function clearFinished() {
   var data = loadData();
    for (i = data.length - 1; i >= 0; i--) {
        if (data[i].done == true && data[i].repeat == false) {
            remove(i);
        }
    }
    load();
}
```

#### • 控制左滑删除

```
function addListener() {
   var obj = document.querySelectorAll("li");
   var deviceWidth = window.innerWidth;
   var isDelete = false;
   var flag = 0;

for (i = 0; i < obj.length; i++) {

   var p = i;
   var startX, startY;
   obj[i].addEventListener('touchstart', function (ev) {

       startX = ev.touches[0].pageX;
       startY = ev.touches[0].pageY;
   }, false);
   obj[i].addEventListener('touchmove', function (ev) {</pre>
```

```
ev.preventDefault();
            var endX, endY;
            endX = ev.changedTouches[0].pageX;
            endY = ev.changedTouches[0].pageY;
            if (endX - startX < -deviceWidth / 3) {</pre>
                var data = loadData();
                var datum = { "title":
this.querySelector("p").firstChild.data, "date":
this.querySelectorAll("div")[0].firstChild.data, "time":
this.querySelectorAll("div")[1].firstChild.data };
                for (j = 0; j < data.length; j++) {
                    if (data[j].title == datum.title && data[j].date ==
datum.date && data[j].time == datum.time) {
                        isDelete = true;
                        flag = j;
                    }
                }
            }
        }, false);
        obj[i].addEventListener('touchend', function (event) {
            if (isDelete && this != null) {
                remove(flag);
            if (isDelete) {
                if (navigator.vibrate) {
                    navigator.vibrate(1000);
                } else if (navigator.webkitVibrate) {
                    navigator.webkitVibrate(1000);
                }
            }
            isDelete = false;
            flag = 0;
       }, false);
   }
}
```

### 开发环境

● 操作系统

○ 开发环境: macOS Big Sur 11.2.3

○ 部署环境: GitHub

● 测试环境:

- o Safari on iPhone12
- o Chrome on iPhone 12

- IDE: Visual Studio Code2
- 开发语言
  - o HTML
  - o CSS
  - JavaScript
